# Main Features | Total transparency

Main feature of the new Twin & Twin Midi Sv is the **transparency** which creates an expanded spatiality where **light and space** become the **protagonists** of the display cabinet.

The **transparent back** of both the linear cabinet and the head cabinet, together with the **glass shelves**, allow the visibility of all the displayed products from every point of view. In this way, the light present in the store merges into the refrigerated counter making the displayed products stand out in a natural way.

## Total flexibility

The new Twin & Twin Midi SV are the compact island dedicated to the self-service fresh food area with high economic efficiency. Generally used for corners dedicated to specific products, linked to territoriality or to emphasize a thematic area of added value and therefore highly attractive to the customer. To maximize the profitability of this area Eurocryor offers a versatile cabinet that allows for varied merchandising, also for smaller surfaces.
